Konstantina Rodi

Computer and Informatics Engineer | Content Creator

Summary

I am Konstantina Rodi and I was born in Patras in 1991. From an early age, I was greatly interested in computers and the way they function and perform. During my school days I was able to deal with IT issues and after attending the Technical Professional/Vocational Lyceum in Patras, I was able to expand my skills and receive further training on Specialty Support Systems, Applications and Networks.

Following this dream of mine, I have recently graduated from the Department of Computer Engineering & Informatics at the Technological Educational Institute of Western Greece after successfully completing my thesis on networks ("Networks and their Applications"). Furthermore, I had the opportunity of completing my internship at the Computer Technology Institute and Publications as technical support assistant at the Information System myschool (May-November 2016).

I have a lot of hobbies which mostly include reading, watching movies, dancing, listening to good music, writing articles, watching theatrical performances. I also love volunteering and i have participated in multiple events and at non-profit Organization Intermediakt.

Experience

Freelance Web Development

Frontend Web Developer

April 2018 - Present

You will soon be able to see my portfolio

Daily Little Things

Owner & Content Creator
